

HC-QG-C NEW Panel Cutting Machine (Conveyer)

SPECIAL FUNCTION:

- Computer controlled panel cutter;
- Designed to work with quilting machine or on its own;
- Machine is capable of cutting quilted panels, borders, trimming sides;
- PLC control and touch screen for easy operation;
- -Encoder setting of panel lengths for your own dimension cutting.;
- Infrared setting of panel lengths for accurate panel cutting, safe in operation;
- Pneumatic sharpening device to maintain cutting blades, pneumatic material pressing system and pneumatic material pulling system to press and pull material automatically.
- Reliable border feeding and cutting mechanism.
- Auto working table and width adjustable design for precise length.
- Stable, vibration free operation with low noise and high efficiency.

New Features:

1. Choose 10 inch large screen, fully intelligent control.
2. Intelligent control of side cutting size and cross cutting size makes operation more convenient and output more accurate.
3. The double axis adopts large roller, enables fabric goes in smoothly, makes cutting size accurate, and cutting edge neat.
4. Encoder and sensor double length detecting, can do different sizes setting

Technical Specification

Size (L×W×H)	3900*3500*2100mm
Weight	1500kg
Length of board	2000mm
Cutting thickness	3-80mm
Cutting width	100-2500mm
Speed	7000mm/min
Air pressure	3KW
Voltage	380V/50HZ 220V/60HZ
Power	0.4-0.8Mpa
